INCEPTION: 2 NOVEMBER 2020

Differences in performance between the Munro Global Growth Fund and MAET (ASX quoted fund) relate to their respective inception dates, the buy/sell spread of the iNAV for MAET.ASX, the timing difference between the issuing of units during the day on the ASX for MAET and the purchase of units in the Munro Global Growth Fund at the end of the day. This may result in reporting small differences in performance.

MONTHLY SUMMARY

- The Munro Global Growth Fund returned -11.1% net for July. Long equities, hedging and currency detracted from performance.
- July was marked by a sharp selloff and pullback across the AI and semiconductor complex, as investors reassessed valuations following an exceptional run over the past year. Munro views the recent AI weakness as a healthy correction within an ongoing secular bull market, rather than the start of a structural downturn. We have followed our standard risk management processes around stock stop losses. For companies that we have maintained in the funds we remain broadly confident that their strong earnings trends remain in place across a range of different Aols and structural growth trends.
- Key contributors to performance for the month were Amazon (E-Commerce), Mastercard (Digital Payments) and Raytheon Technologies (Security).
- Key detractors from performance for the month were Applied Materials (High Performance Computing), ASM International (High Performance Computing) and Nokia (Connectivity).
